

# Clear findings. Informed decisions.

Medical & laboratory  
equipment services

# Know the condition. Plan the next step.

Inspection, testing, repair and rental support for your equipment.

## INSPECT & TEST

Functional and performance checks. Electrical safety testing where applicable.

Inspection service includes a service report and service label.

## REPAIR

Diagnose faults, agree on repairs and verify the completed work.

## RENT

Short-term replacement medical equipment. Ask about availability.

---

### EQUIPMENT & SERVICES

**03** Cardiac & monitoring

**05** Clinical & sterilization

**07** Laboratory processing

**09** Airflow & enclosures

**11** Short-term medical rental

**04** Imaging & respiratory

**06** Laboratory measurement

**08** Cold storage & temperature

**10** Equipment repairs

**12** Contact & next steps

# Cardiac & monitoring.

See the signals. Check the response.

## EQUIPMENT WE COVER

- AEDs; standard and multiparameter defibrillators
- Patient, cardiac & vital signs monitors
- ECG / EKG machines
- Manual & automatic blood pressure equipment
- Pulse oximeters

## SERVICES WE PROVIDE

- Simulate ECG, SpO2 and NIBP signals.
- Verify pressure accuracy and leaks.
- Test defibrillator output, energy and synchronization.
- Check batteries, alarms, leads and printouts.
- Troubleshoot faults and perform approved repairs.

# Imaging & respiratory.

A clearer view of system performance.

## EQUIPMENT WE COVER

- Portable & cart-based ultrasound
- Stress test systems
- PFT systems & spirometers
- Oxygen concentrators
- Suction pumps / aspirators

## SERVICES WE PROVIDE

- Evaluate ultrasound systems and up to four standard probes.
- Verify ECG, treadmill speed/grade and stop functions.
- Test oxygen flow, purity and alarms.
- Verify suction vacuum, spirometer volume and basic PFT performance.
- Diagnose faults and quote model-specific repairs.

# Clinical & sterilization.

Everyday equipment. Focused checks.

## EQUIPMENT WE COVER

- Tabletop autoclaves / sterilizers
- Powered beds; exam chairs & tables
- Hydrocollators
- Medical printers
- Wall transformers / diagnostic stations

## SERVICES WE PROVIDE

- Perform tabletop sterilizer PM and agreed cycle verification.
- Inspect movement, controls, bed brakes and rails.
- Check hydrocollator temperature and thermostat.
- Test print quality, diagnostic-station power and functions.
- Troubleshoot and repair approved mechanical or electrical faults.

# Laboratory measurement.

Make measurement performance clear.

## EQUIPMENT WE COVER

- Patient / clinical scales & lab balances
- Single-, 8- & 12-channel pipettes
- Turbidity meters
- Clinical microscopes
- Calorimeters: model-specific scope

## SERVICES WE PROVIDE

- Verify scale accuracy, linearity, repeatability and load response.
- Perform gravimetric pipette verification; clean single-channel units.
- Check turbidity meters against suitable standards.
- Clean and align microscope optics; make minor adjustments.
- Confirm a model-specific calorimeter inspection/calibration scope.

# Laboratory processing.

Checks and repairs for everyday bench equipment.

## EQUIPMENT WE COVER

- Standard / refrigerated centrifuges
- Homogenizers
- Vortex mixers
- Hotplates & stirrers
- Combined hotplate / stirrer units

## SERVICES WE PROVIDE

- Verify centrifuge RPM, timers and lid interlocks.
- Check refrigerated centrifuge temperature.
- Check mixer and homogenizer speed and operation.
- Verify hotplate temperature and stirrer speed.
- Diagnose and repair approved drive, control or electrical faults.

# Cold storage & temperature.

Temperature checks and equipment repair.

## EQUIPMENT WE COVER

- Medical / laboratory refrigerators
- Laboratory freezers
- Standard laboratory incubators
- Shaking incubators
- Temperature-control baths

## SERVICES WE PROVIDE

- Verify temperature at the agreed setpoint.
- Check controls, temperature sensors and alarms.
- Verify shaking-incubator speed and timers.
- Diagnose cooling, heating and temperature-control faults.
- Repair approved faults and replace failed components or door seals.

# Airflow & enclosures.

Inspection and repair for laboratory hoods.

## EQUIPMENT WE COVER

- Laboratory fume hoods
- Ventilated benchtop enclosures

## COMMON SERVICE REQUESTS

Airflow alarms, sash movement, worn seals and equipment control faults.

## SERVICES WE PROVIDE

- Perform basic airflow and smoke checks.
- Check airflow monitors, alarms and equipment controls.
- Inspect sash movement and visible seals.
- Diagnose hood or enclosure component faults.
- Repair or replace approved sash, seal, control and electrical components.

# Equipment repair. Practical support.

Troubleshooting, approved repairs and functional checks.

## EQUIPMENT WE REPAIR

- Refrigerators & freezers
- Fume hoods & ventilated enclosures
- Incubators & temperature-control baths
- Centrifuges, mixers & hotplates
- Tabletop autoclaves / sterilizers
- Monitors & ECG equipment
- Powered exam tables & chairs
- Oxygen concentrators & suction pumps

## HOW WE HANDLE THE WORK

### DIAGNOSE

Identify the fault and affected components.

### QUOTE

Confirm the repair scope, parts and labor.

### REPAIR

Complete approved repairs or component replacements.

### VERIFY

Recheck operation and document the work.

# Medical equipment rental.

A temporary replacement for short-term needs.

Need equipment while your unit is serviced or repaired?  
We provide short-term replacement rentals on request.

## ASK ABOUT RENTAL OPTIONS
